

EVOCHARGE iEVSE – Connecting to local Wi-Fi

Instruction Guide

IMPORTANT SAFETY INSTRUCTIONS

This document contains instructions and warnings that must be followed when installing and using the Electric Vehicle Supply Equipment (EVSE). Before installing or using the EVSE, read this entire document as well as WARNING and CAUTION markings in this document.

Safety Instructions

The symbols used have the following meaning:

WARNING: RISK OF PERSONAL INJURY

WARNING: RISK OF ELECTRIC SHOCK

WARNING: RISK OF FIRE

CAUTION: RISK OF DAMAGE TO THE EQUIPMENT

- The charging station must be installed and repaired only by a licensed electrician.
- Make sure that the materials used, and the installation procedures follow local building codes and safety standards.
- The information provided in this manual in no way exempts the user of responsibility to follow all applicable codes or safety standards.
- This document provides instructions for the charging station and should not be used for any other product. Before installation or use of this product, review this manual carefully and consult with a licensed contractor, licensed electrician, or trained installation expert to make sure of compliance with local building codes and safety standards.
-  CAUTION: To reduce the risk of fire, connect only to a circuit provided with the minimum branch circuit overcurrent protection requirements in accordance with the National Electrical Code, ANSI/NFPA 70, and the Canadian Electrical Code, Part I, C22.1.

OVERALL WARNINGS & CAUTIONS

WARNING: RISK OF ELECTRIC SHOCK

Basic precautions should always be followed when using electrical products, including the following:

- Read all the instructions before using this product.
- This device should be supervised when used around children.
- Do not put fingers into the EV connector.
- Do not use this product if the flexible power cord or EV cable is frayed, has broken insulation, or any other signs of damage.
- Do not use this product if the enclosure or the EV connector is broken, cracked, open, or shows any other indication of damage.

WARNING: RISK OF ELECTRIC SHOCK

Improper connection of the equipment grounding conductor can result in a risk of electric shock. Check with a qualified electrician or serviceman if you are in doubt as to whether the product is properly grounded.

WARNING: RISK OF ELECTRIC SHOCK

- Do not touch live electrical parts.
- Incorrect connections may cause electric shock.

WARNING: This equipment is intended only for charging vehicles that do not require ventilation during charging. Please refer to your vehicle's owner's manual to determine ventilation requirements.

1.1 Overview

This guide provides instructions on how to connect your EVOCHARGE iEVSE to local Wi-Fi signal. Note, this step is only required when using the optional third party OCPP network service with the EVOCHARGE iEVSE and iEVSE Plus charging station products.

1.2 Access the EVOCharge Web Portal via Wi-Fi Connection

1. First, we need to connect a laptop or mobile phone to the EVOCHARGE iEVSE. Each EVOCHARGE iEVSE has a unique Wi-Fi signal that is identified based on the unique serial number of the charging station. To start, first note down the serial number of the EVOCHARGE iEVSE charging station you would like to connect to via Wi-Fi.
 - a. The unique serial number is located on the Product ID label located on the side of the charging station and will consist of the following structure: “1EO3-1-YYMM-XXXXX” (e.g. 1EO3-1-1836-00104)
2. Next, using laptop or mobile phone, proceed with setting up a Wi-Fi connection and locate the EVOCHARGE iEVSE Wi-Fi signal that correlates with the unique serial number.
 - a. The Wi-Fi signal name will consist the following structure: “IC3-YYMMXXXXX” (e.g. IC3-183600104), as shown below:

- a. Next, click “Connect” and proceed to enter the password (network security key). The network security key correlates to the unique serial number of each EVOCHARGE iEVSE and consists of the following structure: “YYMMXXXXX@IC3” (e.g. 183600104@IC3).
- b. Upon successful Wi-Fi connection to the EVOCHARGE iEVSE charging station, you will see the unique Wi-Fi signal connection such as shown below:

1.3 Web Portal Access & Overview

1.3.1 Web Portal Access

1. Once your laptop or cellular phone is connected to the EVOCHARGE iEVSE charging station via Wi-Fi, open a web browser (e.g. Google Chrome or Internet Explorer) and enter the following IP address into the address bar and press “enter”: 192.168.100.1

Or click on the following hyperlink: <http://192.168.100.1>

Once the IP address is entered, you should see the EVOCHARGE Web Portal login screen:

Note: You may receive a webpage security warning message after entering the “192.168.100.1” IP address when accessing the Web Portal – click accept to proceed to the web portal page.

For Administrator access, use the following default user name and password:

User Name: admin

Password: EVO32iEVSE

Note: If any issues accessing the Web Portal as outlined above, you may need to refresh the webpage and repeat the login process or setup a Static IP Address on your computer. Enter the IP address: 192.168.100.1; Subnet mask: 255.255.0.0

1.4 Web Portal Menu Overview

Once logged in to the Web Portal, you will see the following Menu List on the Left side of the screen:

- Configuration
- Maintenance
- EVSE Status
- LLM Status
- Security

1.4.1 Communication Settings Tab

Clicking on the “**Configuration**” and then “**Communication Settings**” link will bring up the following screen:

The screenshot shows a web browser window displaying the EvoCharge Web Portal. The address bar shows the URL 192.168.100.1/html/device.html?lang=en-US. The page has a light blue header with the EvoCharge logo and a 'Logout' button. A left sidebar contains navigation links: Configuration, Maintenance, EVSE Status, LLM Status, and Security. The main content area is titled 'Communication Settings' and is divided into several sections: 'Factory Settings', 'Station Settings', 'OCPP Settings', and 'Communication Settings'. The 'Communication Settings' section includes fields for Network Mode (Direct), Gateway LAN IP (192.168.199.1), Max Group Size (12), Gateway Serial Number, Hide AP SSID (On), and Connectivity (Auto). Below this is the 'Active Device Status' section with fields for Active Device (None), Active IP Address, Active Netmask, Active Gateway, Active Primary DNS, and Active Secondary DNS. The 'Wi-Fi Settings' section includes SSID (with a Scan button), Security (Auto), Password, BSSID, Wi-Fi MAC Address (9E:65:F9:04:5D:2F), and Wi-Fi Signal Strength. The 'Cellular Settings' section includes MNC and ICCID fields.

On this page you can set up the Wi-Fi network connection by completing the following steps:

- 1) Under the “**Wi-Fi Settings**” section, click the “**Scan**” button to the right of the “**SSID**” field.
- 2) Next, click the drop-down menu under the “**SSID**” field and locate the local Wi-Fi signal you would like to connect the charging station to.
- 3) Once the Wi-Fi signal you would like to connect to is selected, enter the Wi-Fi password within the “**Password**” field. Note: The password field is a masked entry, care must be taken to enter the password correctly in order to allow for successful Wi-Fi connection.
- 4) To finish, click the “**Apply**” button at the bottom-right of the “**Communication Settings**”.
- 5) If the Wi-Fi connection is successful, you will see a Wi-Fi signal icon at the bottom-right of the EVOCHARGE iEVSE OLED display screen.
