

Electric Vehicle Charging Stations for Auto Centers

Repair shops, service centers, and dealerships

Keep your charging area clean and safe, adhering to OSHA compliance

Facilities with charging stations attract customers who own EVs

Balance the electricity to each charger with load management capabilities

NEMA 4 rated for indoor or outdoor use, charging stations are UL rated

WHY EVOCHARGE?

- Choose from three connectivity options: non-networked, WiFi, or 4G LTE
- Our True Open Charge Point Protocol (OCPP) allows you to select the third-party network provider of your choice
- EvoReel cable management comes in 25 and 30 foot lengths, and is mountable to wall, ceiling, or pedestal

PRODUCT FEATURES

- SAE J1772 charging handle works with all EVs in North America (Tesla with adapter)
- RFID card reader option available
- NEMA 4 rated for indoor and outdoor use
- Multiple cord lengths, cable management, and mounting options

LOCAL LOAD MANAGEMENT

Installing multiple charging stations at one location? Local Load Management (LLM) allows you to use your building's existing electrical panel power capacity by allowing the stations to talk to each other, doling out a steady electrical current to each. There are two ways to set up this load-sharing: equally distributed or first in, first charged. Learn more at evocharge.com.

ONLINE TOOLS

Utilize our online tools to find the charging station that is right for you, or to learn how quickly our stations will charge your EV. Find these tools at evocharge.com.
