

Electric Vehicle Stations for Multi-Unit Housing

Apartments, condos, townhomes, duplexes, and more.

Attract new tenants who
drive EVs

Improve current tenant
satisfaction

Qualify for utility discounted
rates and tax rebates

Optional avenue for passive
income

WHY EVOCHARGE?

- Our True Open Charge Point Protocol (OCPP) allows you to select the third-party network provider of your choice
- Industry leading cable management keeps charging areas safe and clean
- Manage multiple charging stations with Local Load Management (LLM). Avoid costly infrastructure updates by using the building's existing electrical circuit

PRODUCT FEATURES

- SAE J1772 charging handle works with all EVs in North America (Tesla with adapter)
- RFID card reader option available
- NEMA 4 rated for indoor and outdoor use
- Multiple cord length, cable management, and mounting options

LOCAL LOAD MANAGEMENT

Installing multiple charging stations at one location? Local Load Management (LLM) allows you to use your building's existing electrical panel power capacity by allowing the stations to talk to each other, doling out a steady electrical current to each. There are two ways to set up this load-sharing: equally distributed or first in, first charged. Learn more at evocharge.com.

ONLINE TOOLS

Utilize our online tools to find the charging station that is right for you, or to learn how quickly our stations will charge your EV. Find these tools at evocharge.com.

SAFETY RATINGS

- ADA/OSHA compliant: keep charging areas safe with cable management, and by mounting the stations at an accessible height
- NEMA 4-rated: Suitable for use inside a garage or outside in a parking lot
- Charging stations are UL listed, and EvoReel cable management is ETL listed
