

Electric Vehicle Charging Stations for Parking

Parking lots and ramps

Easily manage multiple charging stations

Generate additional income

Attract a growing segment of drivers (EVs)

Universal charger works with all electric vehicles

WHY EVOCHARGE?

- Choose from three connectivity options: non-networked, WiFi or 4G LTE. Optional RFID card reader-enabled systems make controlling access as simple as tap and charge.
- True Open Charge Point Protocol (OCPP) allows you to select the third-party network provider of your choice, which makes managing the stations simple.
- Safe and clean charging with OSHA and ADA compliance. Our cable management systems keep cords out of the way to ensure a safe, clean and efficient charging area.

PRODUCT FEATURES

- SAE J1772 charging handle works with all EVs in North America (Tesla with adapter)
- RFID card reader option available
- NEMA 4 rated for indoor and outdoor use
- Multiple cord lengths, cable management, and mounting options

LOCAL LOAD MANAGEMENT

Local Load Management (LLM) allows you to balance the electrical load of up to 20 charging stations at a time using your building's existing electrical panel power capacity. LLM allows full control over how your charging stations work together and individually, optimizing performance and maximizing savings. Learn more at evocharge.com.

ONLINE TOOLS

Utilize our online tools to find the charging station that is right for you, or to learn how quickly our stations will charge your EV. Find these tools at evocharge.com.

SAFETY RATINGS

- ADA/OSHA compliant: keep charging areas safe with cable management, and by mounting the stations at an accessible height
- NEMA 4-rated: Suitable for use inside a garage or outside in a parking lot
- Charging stations are UL listed, and EvoReel cable management is ETL listed
