

EvoCharge App Key Features

A licensed electrician should have completed the installation of your EvoCharge charging station. Confirm that your charger is powered on.

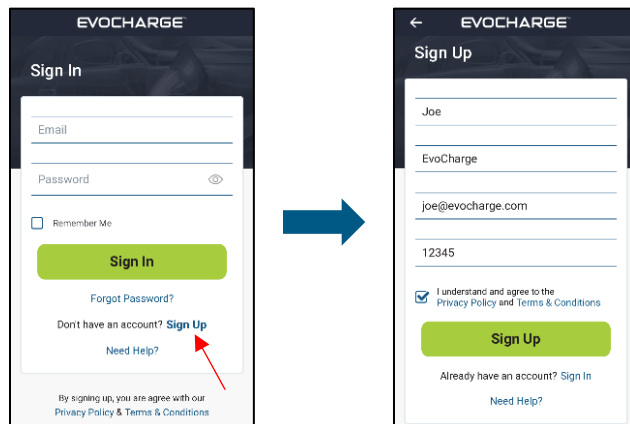

1. Downloading EvoCharge App

Download the EvoCharge app by scanning the QR code below with your mobile device or searching for “EvoCharge” in the Apple App Store™ (for iPhones) or Google Play™ (for Android phones).

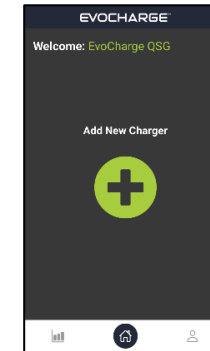

2. Account Setup

To set up an account in the EvoCharge app, select “Sign Up” on the login screen and follow the in-app instructions.

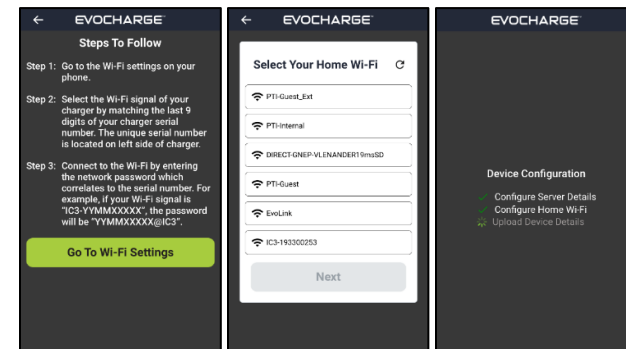

3. Add Charger to Users Account

1. To add a charger to your account login to the app and click on the “Add New Charger” button on the Home screen.

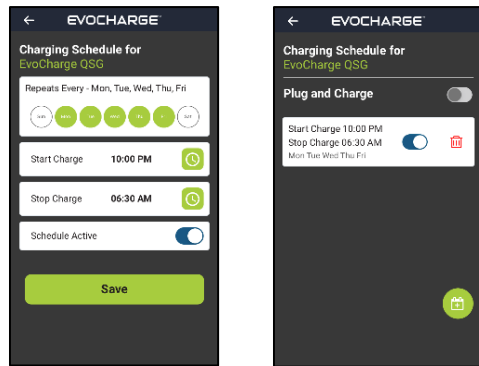

2. Follow the in-app instructions to connect the charger to your local Wi-Fi network.

3. The charger will then reboot once all the onboarding steps have been completed. Please be patient, this will take a few minutes.
4. Congratulations! You have completed connecting your charger to local Wi-Fi and the EvoCharge app.

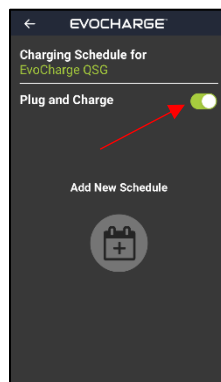

Schedule Charging

- Create a charging schedule that will automatically start your charging session
- Save money by scheduling charging during off-peak electric hours when electricity rates are low

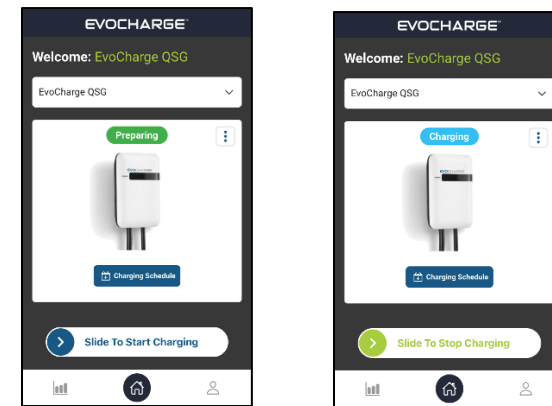

Plug and Charge

- When Plug and Charge is turned on your vehicle will automatically start charging whenever it is plugged in
- This feature will disable your set charging schedules, but when Plug and Charge is turned off the schedules will become active again

Remote Start/Stop Charge

- Remotely start and stop a charging session by using the start/stop slider bar

Charging History

- View your previous charging sessions and see how much energy you are using to charge your vehicle
- Use the interactive chart to visualize your charging energy usage
