

## Electric Vehicle Charging for the Healthcare Industry

*Hospitals, clinics and other healthcare facilities*

Differentiate your facility by offering as an amenity to visitors and staff with EVs

Energy saving and rebates through federal government programs and local utility rebates

Showcase your facility's green initiatives

Safe, clean charging stations that are OSHA and ADA compliant

### WHY EVOCHARGE?

- Choose from three connectivity options: non-networked, WiFi or 4G LTE. Optional RFID card reader-enabled systems make controlling access as simple as tap and charge.
- Industry-leading cable management systems keep cords out of the way to ensure safe, clean and efficient charging areas.
- Our True Open Charge Point Protocol (OCPP) allows you to select the third-party network provider of your choice, which makes managing the stations simple

### PRODUCT FEATURES

- 208-240VAC, 7.2-7.7kW for faster charging
- SAE J1772 charging handle works with all EVs in North America (Tesla with adapter)
- RFID card reader option available
- NEMA 4 rated for indoor and outdoor use
- Multiple cord lengths, cable management, and mounting options

### LOCAL LOAD MANAGEMENT

Local Load Management (LLM) allows you to balance the electrical load of up to 20 charging stations at a time using your building's existing electrical panel power capacity. LLM allows full control over how your charging stations work together and individually, optimizing performance and maximizing savings. Learn more at [evocharge.com](https://evocharge.com).

### ONLINE TOOLS

Utilize our online tools to find the charging station that is right for you, or to learn how quickly our stations will charge your EV. Find these tools at [evocharge.com](https://evocharge.com).

**SAFETY RATINGS**

- ADA/OSHA compliant: keep charging areas safe with cable management, and by mounting the stations at an accessible height
- NEMA 4-rated: Suitable for use inside a garage or outside in a parking lot
- Charging stations are UL listed, and EvoReel cable management is ETL listed
