

Electric Vehicle Charging Stations for the Workplace

Office buildings, warehouses, manufacturing plants, multi-use

Provide an amenity to employees where they spend the majority of their day

Qualify for incentives and rebates

Show your support for sustainable and green initiatives

Enhance public image, supporting new technology

WHY EVOCHARGE?

- Connect easily with units preconfigured units for our preferred network providers. We configure the units before shipping and handle the set up for you.
- Safe and clean charging with OSHA and ADA compliance. Our cable management systems keep cords out of the way to ensure a safe, clean and efficient charging area.
- With RFID card readers, control access to your workplace EV charging station. Know and control who connects while providing a valued amenity to your workers or tenants.

PRODUCT FEATURES

- 208-240VAC, 7.2-7.7kW for faster charging
- SAE J1772 charging handle works with all EVs in North America (Tesla with adapter)
- RFID card reader option available
- NEMA 4 rated for indoor and outdoor use
- Multiple cord lengths, cable management, and mounting options

LOCAL LOAD MANAGEMENT

Local Load Management (LLM) allows you to balance the electrical load of up to 20 charging stations at a time using your building's existing electrical panel power capacity. LLM allows full control over how your charging stations work together and individually, optimizing performance and maximizing savings. Learn more at evocharge.com.

ONLINE TOOLS

Utilize our online tools to find the charging station that is right for you, or to learn how quickly our stations will charge your EV. Find these tools at evocharge.com.
