

EvoCharge Network

Three Affordable Levels

The EvoCharge Network provides a cost-effective way for businesses, such as **hotels, multi-unit housing, workplaces, fleets,** etc to easily manage electric vehicle (EV) charging stations through a cloud-based software. Site owners get access to all the necessary monitoring & reporting for their Level 2 or DC Fast Charging stations through the tiered network services options below.

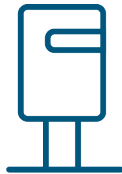

Features	Tier 1	Tier 2	Tier 3
Charge status monitoring	✓	✓	✓
Charging usage reporting	✓	✓	✓
Technician onboarding app	✓	✓	✓
Manually enter utility information	✓	✓	✓
Access control for users		✓	✓
Payment processing			✓

**Prices subject to change. One-time setup activation fee of \$50.00 will be added to invoice.*

Flexibility for Your Business

The EvoCharge Network lets you grow on your own terms, meeting current and future needs. No costly up-front network purchase requirements, with the ability to add network services when needed.

Scalable Solutions

As demand for EV charging increases, easily add chargers to your network plan. Paired with our local load management solution, drastically reduce the cost of installation infrastructure.

Access Made Easy

Eliminate unauthorized charging and provide easy access to your stations. EvoCharge uses simple setup & management of access control via user account emails or adjustable user codes, allowing complete customization of who is charging.

Reliability & Uptime

Site owners get 24-hour access to monitor their stations in real time from the online web portal. Instantly be alerted to potential problems or offline chargers and resolve issues quickly. Maintain uptime while improving customer & tenant satisfaction.
